

## Micah Joseph Jolly

February 27, 1985 - July 4, 2017

We lost our boy on Independence Day. Micah Joseph Jolly was special. He was born on Feb 27, 1985, our oldest son and big brother. He was a musical prodigy, a truly creative genius who wrote, performed and produced an album of incredible depth by the time he was 19. OK, he also fronted for Hanson. He was hilarious, he could keep you in stitches, and make you "Charles" to his "Rupert" with a single syllable. He had an acerbic wit, and an impish way about him—he was Pee Wee Herman on steroids. Really. He had an enormous and far too generous heart - if all he had was three dollars, he would give you four. He loved way too deeply, and had a level of compassion for others that just seemed otherworldly at times. His creativity extended way beyond music, and to those of us who were recipients of his gifts of cooking and drawing and craftwork, we could literally taste and feel his love. If you were his pet, you were among many, and you were among the most spoiled and loved creatures on God's green earth. He loved nature of all kind, and given the camping and survival equipment and skills he amassed, it's no wonder he chose a Natural Burial Park as his final earthly resting place. He is well prepared. He felt life the way a fish feels water. And like too many of the special ones, he flamed out too soon, because he simply burned too bright. The world, and our world, will be a much darker place. But we are convinced that Micah is now resting peacefully in the arms of our Savior, Jesus Christ, and because of that we will see him again. Rest in peace, dear sweet Micah. We love you beyond words. The family will bury Micah in a private ceremony,

and we invite all who loved and knew him to join us in a celebration of his life within the next couple of weeks, TBD. Check Facebook.
